How to Deploy the Journey

Define how you’d like to get your end users on the journey – the “on ramp”

- End users will be considered “Contacts” in the Marketing Admin profile.
- Below are recommendations on how to deploy:
 - Option 1 – Upload your end users as contacts using the data importer and add them to a specific group. Use that group as an on-ramp to the Bootcamp Journey.
 - Option 2 – When end users go through your company’s new hire orientation on Total Expert, use a lead capture app connected to the marketing admin account to gather the end user’s info, saving you the time of adding them as contacts to the marketing admin account. You should have your end users automatically added to a group through the lead capture app, which you can use as an on-ramp to the Journey.
- Adding contacts as part of a new hire onboarding process is a great best practice to make sure all new hires are added to the Journey.

Note

If you do not want to use the marketing admin account, create an additional user dedicated to deploying the Bootcamp Journey and any additional internal marketing messaging you will be leveraging within Total Expert.
