## Introduction

A style sheet is essential for the email builder to work effectively. It allows marketing administrators to harmonize the design of new emails with their brand’s style guide. While there is a default system style sheet available, each organization can create their own style sheet to tailor email designs to their brand. The styles created with the style sheet builder are then automatically applied to emails built with the email builder.

**Note**

The style sheet styles are *only* applied to the email template content. The styles are not applied to any email content blocks.

Style sheet builder does *not* work with the classic email editor. See the following documentation for more information regarding: [classic email editor](#) and [email builder](#).

## Create Style Sheet

You can save a standard batch of cascading style sheets (CSS) code so you can apply it to any email template. These style sheets are created outside the email builder, but you can apply them using the Style Sheet option in the Settings tab of the email builder. You can create a style sheet using the style sheet builder or by importing a batch of existing CSS code.

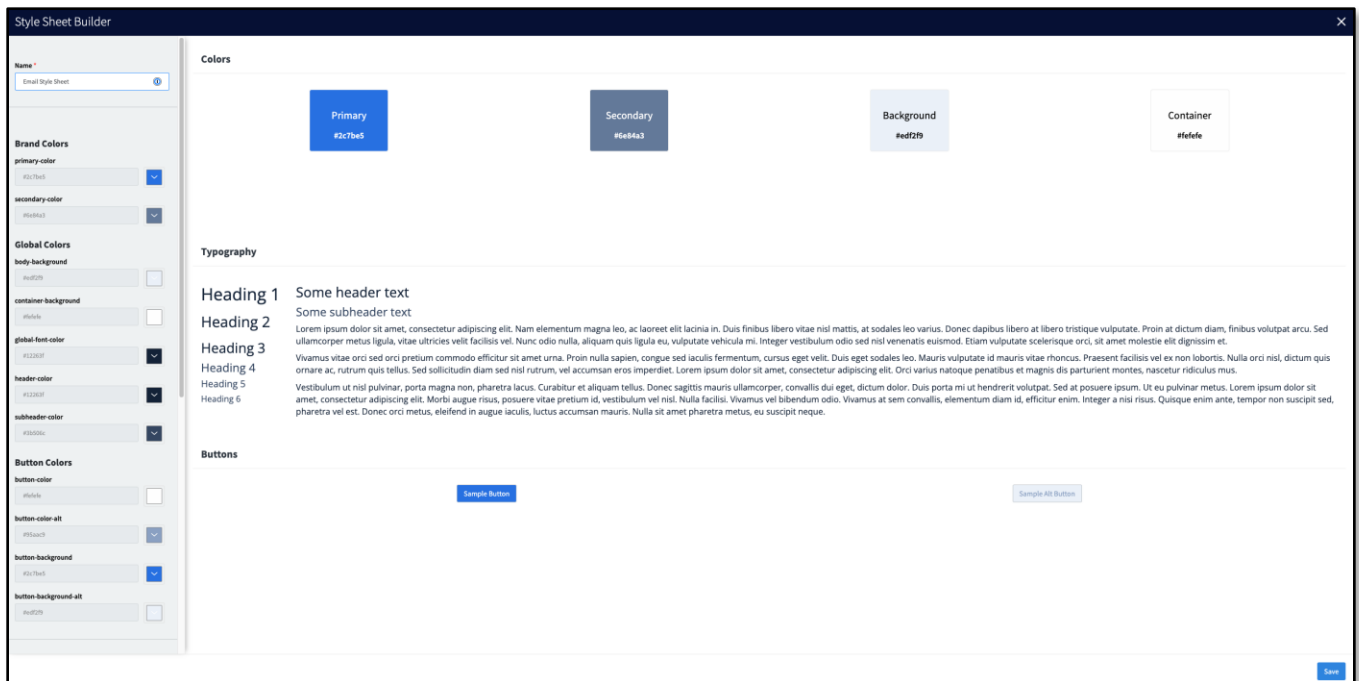

## Note

Any emails created prior to the existence of the new style sheet will not have the new style sheet, even if the new style sheet is set as the default. You can, however, manually update a pre-existing email to use the new style sheet.

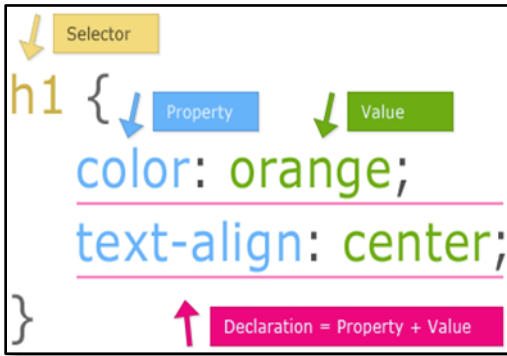

## From Builder

1. Navigate to **Manage Marketing → Style Sheets**.
2. Click the **Add Style Sheet** button in the upper-left corner of the page and select **From Builder** from the drop-down list.
3. In the Style Sheet Builder:
  - a. Enter an identifiable **Name** for the sheet. This is what you will see in the email builder settings.
  - b. Select colors, font families, and font size options for the various options on the sidebar on the left side of the page. Your selections are reflected by the preview elements on the right. (For more details on these selections, see Style Sheet Builder Elements below.)
  - c. Click the **Save** button in the lower-right corner.
4. The settings styles list updates with your new style sheet in the email builder.
  - a. To make your new style sheet the default for your organization, select **Actions → Set as Default**. The default will be applied each time a new email is created by anyone in your organization, unless a different style sheet is selected in the email builder settings.

### Style Sheet Builder Elements

The following image shows the basic CSS syntax:

The following tables describe the fields available to edit in the style sheet builder and what CSS styles they control.

### Brand Colors

Name	Description	CSS Property	CSS Selector
primary-color	The color selected will be applied to the text color of essentially any general link and visited links.	color	<ul style="list-style-type: none"> <li>a</li> <li>a:visited</li> <li>h1-h6 a</li> <li>h1-h6 a:visited</li> <li>table.menu td.menu-item a</li> <li>table.menu th.menu-item a</li> </ul>
secondary-color	The color selected will be applied to the background and border color of button elements.	background	<ul style="list-style-type: none"> <li>table.button.secondary table td</li> </ul>
		border	<ul style="list-style-type: none"> <li>table.button.secondary table a</li> <li>table.button.secondary table td</li> </ul>

### Global Colors

Name	Description	CSS Property	CSS Selector
body-background	The color selected will be applied across the primary HTML block of the entire email template, including the concealed span preheader text.	background	<ul style="list-style-type: none"> <li>html</li> <li>table.body</li> </ul>
		color	<ul style="list-style-type: none"> <li>span.preheader</li> </ul>
container-background	The color selected will be applied to the background color of the centered background email template block.	background	<ul style="list-style-type: none"> <li>table.container</li> </ul>
global-font-color	The color selected will be applied to the entire email body text color that is not a link.	color	<ul style="list-style-type: none"> <li>body, table.body, p, td, th</li> </ul>

Name	Description	CSS Property	CSS Selector
header-color	The color selected will be applied to all heading text (heading 1–heading 6).	color	<ul style="list-style-type: none"> <li>h1</li> <li>h2</li> <li>h3</li> <li>h4</li> <li>h5</li> <li>h6</li> </ul>
subheader-color	The color selected will be applied to the p element with the class name subheader.	color	<ul style="list-style-type: none"> <li>p.subheader</li> </ul>

### Button Colors

Name	Description	CSS Property	CSS Selector
button-color	The color selected will be applied to all text and links of button elements.	color	<ul style="list-style-type: none"> <li>table.button table td</li> <li>table.button table td a</li> <li>table.button:hover table tr td a</li> <li>table.button:active table tr td a</li> <li>table.button table tr td a:visited</li> <li>table.button.tiny:hover table tr td a</li> <li>table.button.tiny:active table tr td a</li> <li>table.button.tiny table tr td a:visited</li> <li>table.button.small:hover table tr td a</li> <li>table.button.small:active table tr td a</li> <li>table.button.small table tr td a:visited</li> <li>table.button.large:hover table tr td a</li> <li>table.button.large:active table tr td a</li> <li>table.button.large table tr td a:visited</li> <li>table.button:hover table td</li> <li>table.button:visited table td</li> <li>table.button:active table td</li> <li>table.button.secondary table td</li> <li>table.button.secondary table a</li> <li>table.button.secondary:hover table td</li> <li>table.button.secondary:hover table td a</li> <li>table.button.secondary:active table td a</li> <li>table.button.secondary table td a:visited</li> </ul>

Name	Description	CSS Property	CSS Selector
button-background	The color selected will be applied to the background and border color of button elements.	background	<ul style="list-style-type: none"> <li>table.button table td</li> </ul>
		border	<ul style="list-style-type: none"> <li>table.button table td</li> <li>table.button table td a</li> </ul>

### Font Families

Name	Description	CSS Property	CSS Selector
body-font-family	The font selected will be applied to all text in the email template (but <i>not</i> headings).	font-family	<ul style="list-style-type: none"> <li>body</li> <li>table.body</li> <li>p</li> <li>td</li> <li>th</li> <li>table.button table td a</li> </ul>
header-font-family	The font selected will be applied to larger heading text (heading 1–heading 3).	font-family	<ul style="list-style-type: none"> <li>h1</li> <li>h2</li> <li>h3</li> </ul>
subheader-font-family	The font selected will be applied to smaller heading text (heading 4–heading 6).	font-family	<ul style="list-style-type: none"> <li>h4</li> <li>h5</li> <li>h6</li> </ul>

### Font Sizes

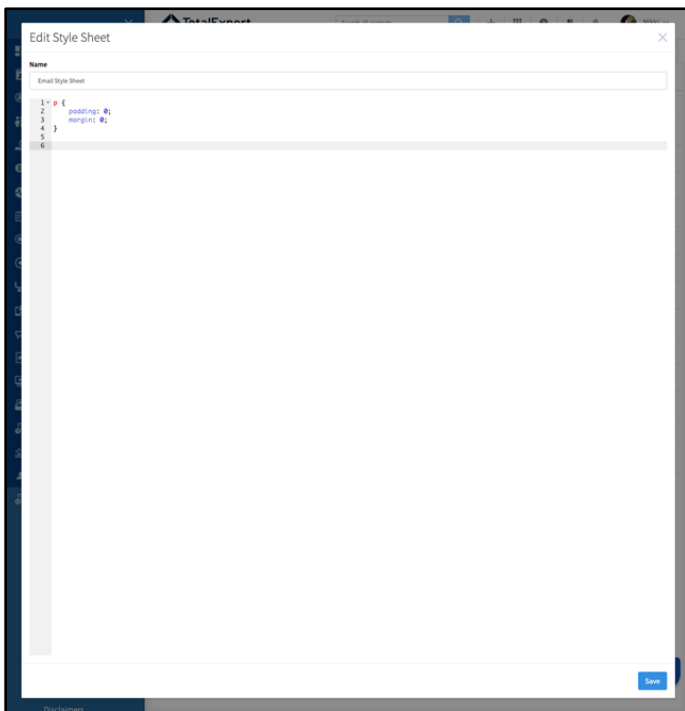

Name	Description	CSS Property	CSS Selector
global-font-size	The font size selected will be applied to all text in the email template (but not headings).	font-size	<ul style="list-style-type: none"> <li>body</li> <li>table.body</li> <li>p</li> <li>td</li> <li>th</li> </ul>
h1-font-size	The font size selected will be applied to heading 1.	font-size	<ul style="list-style-type: none"> <li>h1</li> </ul>
h2-font-size	The font size selected will be applied to heading 2.	font-size	<ul style="list-style-type: none"> <li>h2</li> </ul>
h3-font-size	The font size selected will be applied to heading 3.	font-size	<ul style="list-style-type: none"> <li>h3</li> </ul>
h4-font-size	The font size selected will be applied to heading 4.	font-size	<ul style="list-style-type: none"> <li>h4</li> </ul>

Name	Description	CSS Property	CSS Selector
h5-font-size	The font size selected will be applied to heading 5.	font-size	• h5
h6-font-size	The font size selected will be applied to heading 6.	font-size	• h6

## From Code

1. Navigate to **Manage Marketing → Style Sheets**.
2. Click the **Add Style Sheet** button in the upper-left corner of the page and select **From Code** from the drop-down list.
3. In the Style Sheet Builder:
  - a. Enter an identifiable **Name** for the sheet. This is what you will see in the email builder settings.
  - b. You can add your own specific CSS styling in the code editor. There will be no default stylings for anything not included in your custom CSS.
  - c. Click the **Save** button in the lower-right corner.
4. The settings styles list updates with your new style sheet in the email builder.
  - a. To make your new style sheet the default for your organization, select **Actions → Set as Default**. The default will be applied each time a new email is created by anyone in your organization, unless a different style sheet is selected in the email builder settings.

## Edit Style Sheet

You can edit an existing style sheet using either the style sheet builder or the code editor, regardless of how it was originally created.

**Warning**

If a style sheet is updated, it will not automatically update emails that were built prior to the changes to the style sheet. Previous emails would need to be manually re-opened and re-saved for any stylesheet edits to be applied.

1. Navigate to **Manage Marketing → Style Sheets**.
2. Locate the style sheet you want to edit and click the **Actions** button. Then either:
  - a. Select **Edit** in the drop-down menu to open the style sheet builder.
    - i. Select colors, font families, and font size options for the various options on the sidebar on the left side of the page. Your selections are reflected by the preview elements on the right.
    - ii. Click the **Save** button in the lower-right corner.
  - b. Select **Edit Source** in the drop-down menu to open the code editor.
    - i. Edit the CSS styles in the editor as needed.
    - ii. Click the **Save** button in the lower-right corner.

**Warning**

If a style sheet is originally created using the code editor and later edited using the style sheet builder, any custom CSS code will automatically be overridden.

There is no way to undo this change. Therefore, you should save any custom CSS code that you want to retain before making edits in the style sheet builder.

## Editing the Source Code of the Style Sheet Builder

The style sheet builder lets you choose colors, font families, and font sizes. However, it also automatically applies additional stylings to emails that cannot be adjusted in the builder. You can modify these added styles through the source editor.

**Tip**

This list does not cover all CSS elements that can be modified via the source code. If you need additional updates or feel uncomfortable making changes, you can submit a content request through FreshDesk.

To customize styles not available in the style sheet builder:

1. Navigate to **Manage Marketing → Style Sheets**.
2. Locate the style sheet you want to edit and select **Actions → Edit Source**.
  - a. While in the style sheet code editor, find the CSS Selector Group for the styles you want to adjust.
  - b. Modify the CSS Property as needed to customize the styles for each CSS Selector Group.

### Desktop View Stylings

Description	CSS Property and Value	CSS Selector Group
Padding is added to each of the email column elements.	<ul style="list-style-type: none"> <li>• <code>padding-left: 16px;</code></li> <li>• <code>padding-bottom: 16px;</code></li> </ul>	<ul style="list-style-type: none"> <li>• <code>td.columns</code></li> <li>• <code>td.column</code></li> <li>• <code>th.columns</code></li> <li>• <code>th.column</code></li> </ul>

Description	CSS Property and Value	CSS Selector Group
	<ul style="list-style-type: none"> <li><code>padding-left: 16px;</code></li> </ul>	<ul style="list-style-type: none"> <li><code>td.large-1.first</code></li> <li><code>th.large-1.first</code></li> </ul> (This ranges from 1-12.)
	<ul style="list-style-type: none"> <li><code>padding-right: 16px;</code></li> </ul>	<ul style="list-style-type: none"> <li><code>td.large-1.last</code></li> <li><code>th.large-1.last</code></li> </ul> (This ranges from 1-12.) <ul style="list-style-type: none"> <li><code>td.columns.last</code></li> <li><code>td.column.last</code></li> <li><code>th.columns.last</code></li> <li><code>th.column.last</code></li> </ul>

### Mobile View Stylings

Description	CSS Property and Value	CSS Selector Group
Padding is added to the main table element when viewed on a mobile device.	<ul style="list-style-type: none"> <li><code>padding-left: 16px !important;</code></li> <li><code>padding-right: 16px !important;</code></li> </ul>	<ul style="list-style-type: none"> <li><code>table.body .columns</code></li> <li><code>table.body .column</code></li> </ul>
The width percentage identifies how much of the screen that a table with the class name <code>container</code> takes up on a mobile device.	<ul style="list-style-type: none"> <li><code>width: 95% !important;</code></li> </ul>	<ul style="list-style-type: none"> <li><code>table.body .container</code></li> </ul>

## Style Sheet in the Email Builder

To apply a style sheet to an email template:

1. Navigate to **Email Marketing → Emails**.
2. Click the **Create Email** button and create a new template or select **Actions → Edit** for an existing template.
3. Click the **Settings** tab on the left side of the page.
4. Locate the Styles section and select the styl sheet you want to apply to the email template.

### Tip

The style sheet will apply the CSS styling inline to the email's HTML code once you select it in the email builder and save the email. You can refresh the page and adjust the email to override the style sheet styling, if needed.

# FAQ

## ***Why is my email signature not taking up the entire width of the mobile screen?***

The default stylesheet is set to take up 95% of the screen in mobile view to create space on the left and right sides of a table that has the class name `container`. To have the table take up the entire screen width, update the CSS property `width` from `95%` to `100%` for the CSS selector `table.body .container`.

## ***Do style sheets change based on DBA cost center logic?***

No, the stylesheets cannot dynamically change based on DBA cost center logic. Instead, a workaround is to create distinct style sheets containing the required branding elements and establish base email templates for your organization. Each DBA branding email template can then be assigned its respective style sheet.

## ***I adjusted my stylesheet. Why can't I see the changes?***

Style sheet adjustments are not retroactive. If changes are made to a style sheet after an email has been created, you will need to go back to the email editor, select the desired style sheet, and save the email.

## Appendix: Default Style Sheet Code

```
.wrapper {
  width: 100%;

#outlook a {
  padding: 0;
}

body {
  width: 100% !important;
