

Ingenius/Growth Multiplier Integration

The Ingenius integration allows you to access the Growth Multiplier platform and export loan officer recruit and real estate agent partner data directly into Total Expert. Once completed, you may deploy your communication strategy directly with those professionals using Total Expert's marketing and workflow automation tools. Now, you may also refresh the recruit and real estate information directly within the TE platform so you have the most accurate, up to date information from Ingenius.

Ingenius Integration in a Contact Record
